
DESIGN & ENGINEERING TRAINING

Training Description

Our NX *FastTrack* covers both fundamental and advanced topics for individuals new to or with prior NX experience.

Structure & Scope

Training is delivered in an office/computer lab setting by a certified instructor with current expertise in the industry. The scope of the training is to equip individuals who wish to utilize their skills in a design/engineering capacity.

Summary

NX *FastTrack* is designed to give students an overview of the NX modeling, assemblies, and drafting task-based processes. The real-world experience of our instructors (especially in tooling design) aids students in transferring knowledge gained through this course to their job resulting in faster time to productivity.

At the completion of the NX *FastTrack* class, the student will be able to develop basic solid and assembly models as well as drawings using the master model concept. These concepts can be applied in the real world of product development, tooling and collaboration.

Prerequisites

Basic experience using computers and/or prior CAD experience

Course

SIEMENS | NX

Benefits of IET Training

- Small classroom setting
- Frequent feedback
- Industry expertise
- Immediate application
- Substantial ROI

Cost

\$1,900

2-3 students/referrals = 10% Discount

4 or more students/referrals = 15% Discount

Duration & Location

- Up to 4 weeks
- Mon-Fri
- 9am-1pm or 1pm-5pm (min. 4 hrs./day)
- IET office (address below)

Registration

By phone: (248) 548-4201 Ext. 105
